SUMMARY

First Class Computer Science graduate with practical experience building web, mobile, database, cloud, and AR-based applications across academic and project-based environments. Skilled in React, JavaScript, Firebase, SQL, PHP, Java, and Python, with exposure to UI/UX design, cloud deployment, database optimisation, and AI-assisted feature development. Interested in contributing to junior software development, frontend, mobile, QA automation, application support, or system analyst roles.

EDUCATION

Bachelor of Science (Honours) in Computer Science
University of Southampton Malaysia

Graduation: July 2026
First Class Honours

PROJECTS

Roomara — AR Furniture Shopping Mobile Application | Unity, C#, AR Foundation, Firebase

- Built a mobile AR furniture shopping app with browsing, cart, authentication, and room-scale AR placement.
- Tested AR placement across 3 indoor environments, with occupancy ratios of 20.96%, 20.83%, and 24.17%.
- Conducted usability testing with 29 participants, achieving a mean SUS score of 76.55.

URoute Smart Campus System | React, Firebase, JavaScript, API, Figma

- Developed an app with navigation, room booking, event management, and real-time campus information.
- Built interactive map and pathfinding features to help users locate rooms and navigate campus efficiently.
- Contributed to UI/UX planning, frontend development, Firebase integration, API integration, and testing.

LifeTrack — Cloud-Based Habit Tracking System | GCP, Cloud Run, Cloud SQL, Firebase, Docker

- Developed a habit tracker for sleep, exercise, study, and water intake goals with dashboard visualisation.
- Integrated Firebase Authentication, JWT APIs, and Cloud SQL PostgreSQL for secure user data storage.
- Configured Cloud Monitoring, Cloud Logging, alerts, and Cloud Run autoscaling with up to 20 instances.

Restaurant Management System POS | Java, JavaFX, MySQL

- Built a POS system with customer orders, receipts, admin report, inventory management, and order tracking.
- Designed a MySQL database to manage users, menu items, inventory, orders, and transaction records.
- Separated customer ordering features from admin-side reporting, inventory, and management modules.

TECHNICAL SKILLS

- Programming: Java, Python, JavaScript, PHP, SQL, C#
- Frontend: React, HTML, CSS, Tailwind CSS, Bootstrap, Figma
- Backend & Databases: Node.js, Express.js, Firebase, MySQL, PostgreSQL, Cloud SQL
- Cloud & DevOps: Google Cloud Platform, Cloud Run, Cloud Monitoring, Cloud Logging, Docker, GitHub
- Mobile / AR: Unity, AR Foundation, ARKit, mobile application development
- Tools & Practices: Git, REST APIs, UI/UX design, debugging, documentation, Agile teamwork

WORK EXPERIENCE

Part-Time Marketing Assistant | Soon 4 Interior & Renovation, Johor (Jun 2024 - Jun 2026)

- Utilised data analytics tools (Google Analytics, Meta Ads) to track user engagement trends.
- Automated content scheduling, improving workflow efficiency and data-driven decision-making.

Mathematic Tutor | BrainBuilder Singapore Maths, Singapore (Dec 2023 - May 2024)

- Developed exercises that strengthens students' logical thinking and algorithmic approach.
- Adapted lesson plans using performance metrics, enhancing students' analytical skills.

Internship Coding Instructor | Alphakidz Edu, Johor (Jul 2023 - Nov 2023)

- Taught Unity scripting basics, Python, and Arduino hardware-software integration
- Created real-world coding challenges and debugging exercises for junior-level developers

NOTABLE ACHIEVEMENTS

2024	National Level	Participant – UM Hackathon 2024
2024	University Level	Champion – CSSC Game Expo 2024 (Unity Game Competition)
2023	National Level	Finalist – MMU CodeNexion 2023 (Coding Challenge)
